
Server feedback: raw model trajectories
Lines: mean of 12 seeds. Shading: pointwise 95% t interval of the seed mean (df = 11).
a All nine methods: accuracy
Accuracy (%)
Communication round
b All nine methods: NLL
Negative log-likelihood (nats / example)
Communication round
c Selected methods: late accuracy
Accuracy (%)
Communication round
d Selected methods: late NLL
Negative log-likelihood (nats / example)
Communication round
