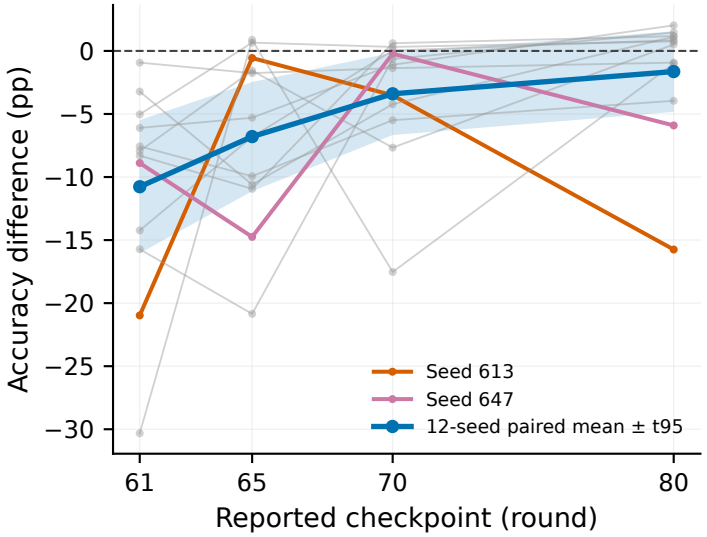
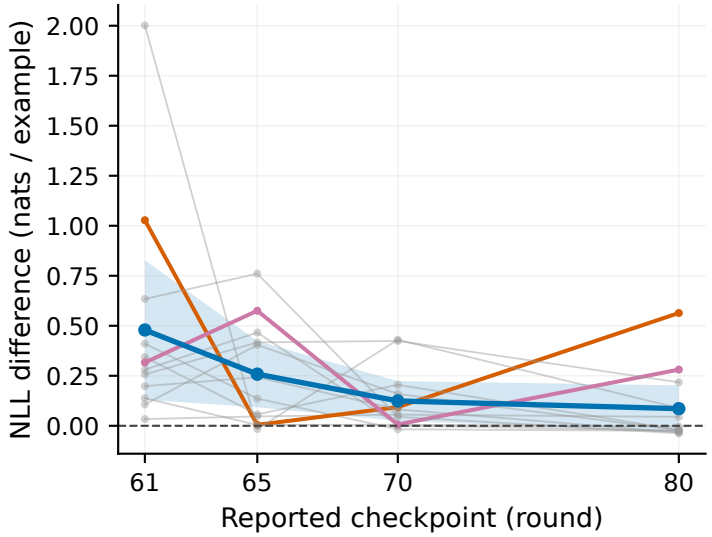
Switching off the server controller after round 60

24 continuation branches; each controller has 12 matched seeds. Accuracy: higher is better; NLL: lower is better.

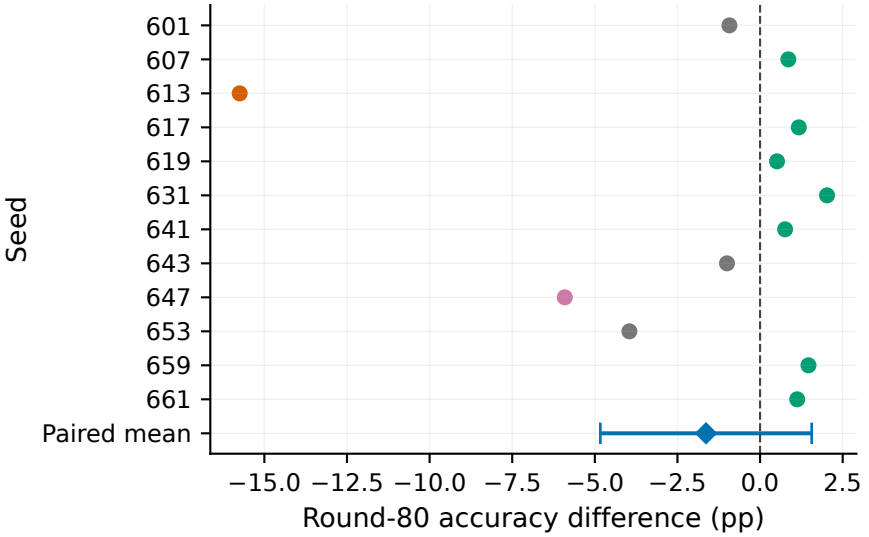
a Scalar controller (4 levels)
Accuracy: switch off − keep controller



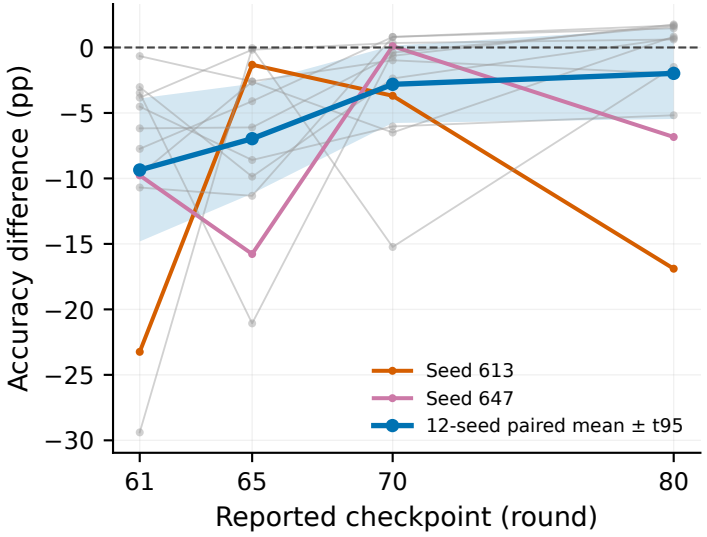
b Scalar controller (4 levels)
NLL: switch off − keep controller



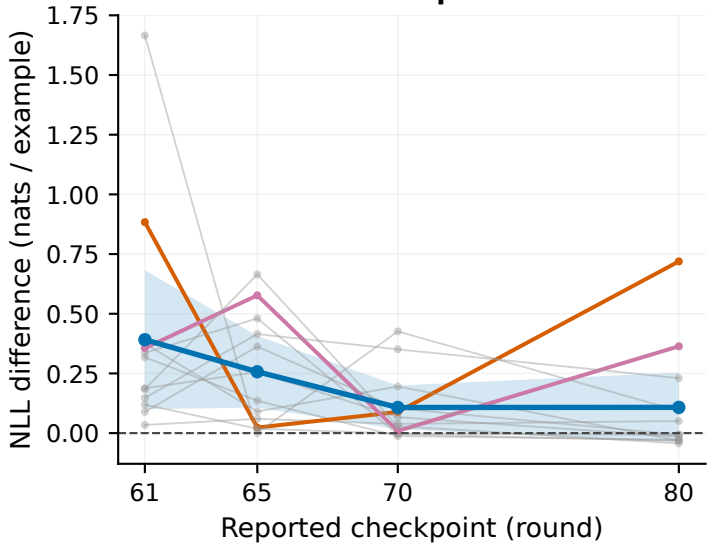
c Round 80: 7/12 seeds improve
Mean -1.64 pp; t95 [-4.83, +1.56]



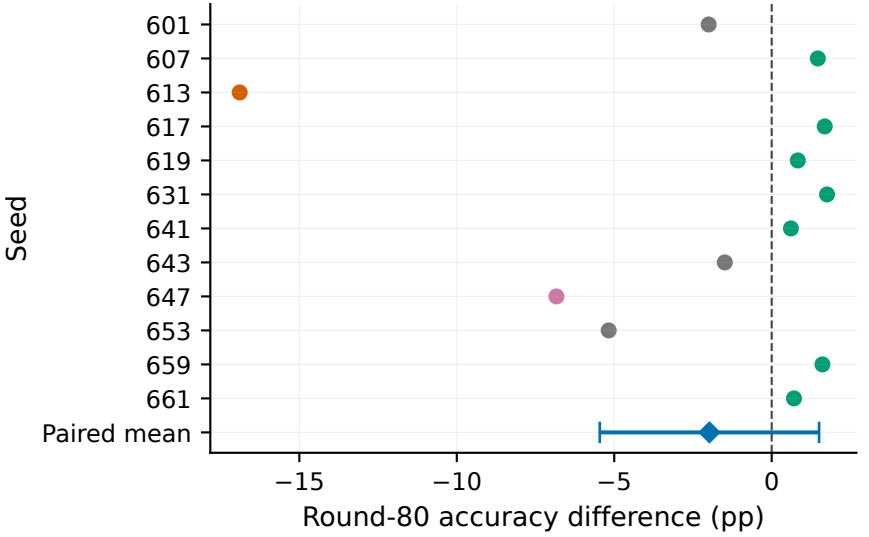
d Two-block controller (16 pairs)
Accuracy: switch off − keep controller



e Two-block controller (16 pairs)
NLL: switch off − keep controller



f Round 80: 7/12 seeds improve
Mean -1.98 pp; t95 [-5.46, +1.51]



Thin lines: individual paired differences. Blue line / band: paired mean / 95% t interval (df = 11).
Only rounds 61, 65, 70, 80 are available in the public paired export; connecting lines guide the eye.
